P2655

Submitter Email: jkile@osmose.com
Type of Project: New IEEE Standard
PAR Request Date: 18-Jul-2017
PAR Approval Date: 28-Sep-2017
PAR Expiration Date: 31-Dec-2021
Status: PAR for a New IEEE Standard

1.1 Project Number: P2655
1.2 Type of Document: Standard
1.3 Life Cycle: Full Use

2.1 Title: Atmospheric Inspection & Assessment

Contact Information for Working Group Chair
   Name: Jon Brasher
   Email Address: jbrasher@ovantellc.com
   Phone: Cell
Contact Information for Working Group Vice-Chair
None

3.2 Sponsoring Society and Committee: IEEE Power and Energy Society/Transmission and Distribution (PE/T&D)
Contact Information for Sponsor Chair
   Name: Daniel Sabin
   Email Address: d.sabin@ieee.org
   Phone: 978-927-8755
Contact Information for Standards Representative
   Name: Michael Garrels
   Email Address: michael.garrels@xcelenergy.com
   Phone: 612.337.2316

4.1 Type of Ballot: Individual
4.2 Expected Date of submission of draft to the IEEE-SA for Initial Sponsor Ballot: 02/2018
4.3 Projected Completion Date for Submittal to RevCom
Note: Usual minimum time between initial sponsor ballot and submission to Revcom is 6 months.: 10/2018

5.1 Approximate number of people expected to be actively involved in the development of this project: 50
5.2 Scope: This standard provides requirements to: (1) help utilities identify structures that may be high risk for above-grade corrosion; (2) inspect the selected structures; (3) categorize the condition of structures based on corrosion degradation; (4) prioritize structures requiring additional inspection based on those findings; and (5) help identify next steps as required.

5.3 Is the completion of this standard dependent upon the completion of another standard: No
5.4 Purpose: Purpose--The purpose of this standard is to provide procedures for the use of common inspection practices and technology on structures above grade. The standard includes:
(a) assessment of historical data to categorize inspection priority;
(b) above-grade inspection and assessment to categorize structures by level of condition;
(c) site-specific environmental factors and atmospheric conditions;
(d) evaluation of existing modifications and repairs.

5.5 Need for the Project: This document is needed to educate the industry on issues on utility structures associated with atmosphere corrosion.

5.6 Stakeholders for the Standard: Electric utilities, telecom owners/providers
Intellectual Property
6.1.a. Is the Sponsor aware of any copyright permissions needed for this project?: No
6.1.b. Is the Sponsor aware of possible registration activity related to this project?: No

7.1 Are there other standards or projects with a similar scope?: No
7.2 Joint Development
   Is it the intent to develop this document jointly with another organization?: Yes
      Organization: NACE - National Association of Corrosion Engineers International
      Technical Committee Name: Atmospheric Inspection & Assessment
      Technical Committee Number: TG529
      Contact Name: Tom Langill
      Phone: 3039051886
      Email: tlangill@galvanizeit.org

8.1 Additional Explanatory Notes: IEEE & NACE have agreed to jointly develop this document under the IEEE/NACE MOU. NACE previously started this document and has agreed to wait for IEEE before proceeding.
